

Drawing and Painting Websites

   	<p>Art for Kids Hub (all ages - some drawings suit younger kids, some suit older kids - a good selection)</p> <p>I love this guy! He teaches like we teach at artKids, ie, he refers to lines, shapes and angles as well as the whole object. He draws alongside one of his kids, and it is great for our artKids to see another kid's drawing - less pressure on them to feel they have to draw it as good as the adult version. You can either access through their website or their YouTube channels.</p> <p>Website: https://www.artforkidshub.com/</p> <p>YouTube - Kid Friendly version (needs parents to set up a log in but much more control over which videos your kids will see) https://www.youtubekids.com/channel/UC5XMF3Inoi8R9nSi8ChOsdQ</p> <p>YouTube - will contain ads https://www.youtube.com/artforkidshub</p> <p>You can buy their e-books of step-by-step tutorials for just US\$1.99 currently. https://shop.artforkidshub.com/</p>
